

Market Report

Global Heat Exchanger Market

Published: October, 2013
Publisher: Acmite Market Intelligence
Language: English
Pages: 577
Price: from 1,490 Euro

Abstract

Benefiting from technology innovations and robust growth in the application markets such as fuel processing, power plants, HVAC and others, heat exchanger market is experiencing well above industry average growth. Stricter environmental regulations and ever-growing pressure of energy costs bring both challenges and chances for the heat exchanger market.

The global demand on heat exchangers reached US\$42.7 billion in 2012. With a growth of approximately 7.8% annually in the next years, the market is expected to approach US\$57.9 billion by 2016 and to increase to US\$78.16 billion by 2020.

Tubular heat exchangers including shell and tube heat exchangers are still the largest product group, followed by plate-type heat exchangers. Accounting for more than half of the heat exchanger market, Metals and alloys are the mostly wide used materials for heat exchangers. Technology innovations in engineering materials such as polymers and ceramics contribute new growth to the industry.

Acmite Market Intelligence has finished a most comprehensive report on global heat exchanger market. It is ready for order.

The report examines the current products and application areas, provides extensive market data of 2012, and market forecast through 2016 to 2020. It also outlines the competition landscape, evaluates market chances and risks and anticipates future trends based on a series of influence factors.

- 207 pages analyzing the market
- 60 figure tables
- 325 company profiles of heat exchanger manufacturers

With a multi-dimensional and in-depth view of world heat exchanger market, this report is ideal help for you with decisions about international market penetration, business expansion or project feasibility analysis.

Table of Contents

Volume I

1 Market definition and segmentation.....	1
1.1 Definition and classification of Heat Exchangers.....	1
1.2 Heat exchanger designs and materials.....	6
1.3 Applications and end uses.....	8
2 World economic environment.....	11
3 Overview of heat exchanger market.....	19
3.1 Market size and outlook.....	19
3.1.1 Heat exchanger market by material.....	19
3.1.2 Heat exchanger market by type.....	22
3.1.3 Heat exchanger market by application.....	25
3.1.4 Heat exchanger demand by region.....	28
3.1.5 Heat exchanger production by region.....	31
3.2 Market trends and chances.....	34
3.3 Industry dynamics.....	41
3.4 Investment, M&A.....	51
3.5 Competition analysis.....	65
4 Heat Exchanger Market by Materials.....	91
4.1 Metallic heat exchangers.....	91
4.1.1 Products and uses.....	91
4.1.2 Metallic heat exchanger market by material.....	93
4.1.3 Metallic heat exchanger market by type.....	94
4.2 Polymeric heat exchangers.....	95
4.2.1 Products and uses.....	95
4.2.2 Polymeric heat exchanger market by materials.....	97
4.2.3 Polymeric heat exchanger market by type.....	98
4.3 Ceramic heat exchangers.....	99
4.3.1 Products and uses.....	99
4.3.2 Ceramic heat exchanger market by material.....	101
4.3.3 Ceramic heat exchanger market by type.....	102

4.4 Other heat exchangers.....	103
5 Market by heat exchanger types.....	105
5.1 Tubular / shell and tube heat exchangers.....	105
5.1.1 Products, features and applications.....	105
5.1.2 Market data and forecast.....	109
5.1.2.1 Tubular / shell and tube heat exchanger demand by type.....	111
5.1.2.2 Tubular / shell and tube heat exchanger demand by region.....	112
5.1.2.3 Tubular / shell and tube heat exchangers demand by application.....	113
5.2 Plate-type heat exchangers.....	114
5.2.1 Products, features and applications.....	114
5.2.2 Market data and forecast.....	116
5.2.2.1 Plate type heat exchanger demand by type.....	118
5.2.2.2 Plate type heat exchanger demand by region.....	119
5.2.2.3 Plate type heat exchanger demand by application.....	120
5.3 Finned heat exchangers.....	121
5.3.1 Products, features and applications.....	121
5.3.2 Market data and forecast.....	125
5.3.2.1 Finned heat exchanger demand by type.....	127
5.3.2.2 Finned heat exchanger demand by region.....	128
5.3.2.3 Finned heat exchanger demand by application.....	129
5.4 Regenerative heat exchangers.....	130
5.4.1 Process, products and applications.....	130
5.4.2 Market data and forecast.....	132
5.4.2.1 Regenerative heat exchanger demand by type.....	134
5.4.2.2 Regenerative heat exchanger demand by region.....	135
5.4.2.3 Regenerative heat exchanger demand by application.....	136
5.5 Other heat exchangers.....	137
6 Market by application.....	139
6.1 Chemical processing.....	139
6.1.1 Application and market segmentation.....	139
6.1.2 Market data and forecast.....	143
6.1.2.1 Heat exchanger market in Chemical processing by type.....	145
6.1.2.2 Heat exchanger market in Chemical processing by region.....	146

6.2 Fuel Processing.....	147
6.2.1 Application and market segmentation.....	147
6.2.2 Market data and forecast.....	149
6.2.2.1 Heat exchanger market in Fuel processing by type.....	152
6.2.2.2 Heat exchanger market in Fuel processing by region.....	152
6.3 HVAC and Refrigeration.....	153
6.3.1 Application and market segmentation.....	153
6.3.2 Market data and forecast.....	155
6.3.2.1 Heat exchanger market in HVAC and Refrigeration by type.....	157
6.3.2.2 Heat exchanger market in HVAC and Refrigeration by region.....	158
6.4 Food & beverage.....	159
6.4.1 Application and market segmentation.....	159
6.4.2 Market data and forecast.....	161
6.4.2.1 Heat exchanger market in food & beverage industry by type.....	163
6.4.2.2 Heat exchanger market in food & beverage industry by region.....	164
6.5 Power Generation.....	165
6.5.1 Application and market segmentation.....	165
6.5.2 Market data and forecast.....	167
6.5.2.1 Heat exchanger market in power generation industry by type.....	169
6.5.2.2 Heat exchanger market in power generation industry by region.....	170
6.6 Marine Industry.....	171
6.6.1 Application and market segmentation.....	171
6.6.2 Market data and forecast.....	174
6.6.2.1 Heat exchanger market in marine industry by type.....	176
6.6.2.2 Heat exchanger market in marine industry by region.....	177
6.7 Paper and Pulp.....	178
6.7.1 Application and market segmentation.....	178
6.7.2 Market data and forecast.....	181
6.7.2.1 Heat exchanger market in paper and pulp industry by type.....	183
6.7.2.2 Heat exchanger market in paper and pulp industry by region.....	184
6.8 Other applications.....	185
7 Market by region.....	187
7.1 Western Europe.....	187

7.1.1 Heat exchanger demand by type in W. Europe.....	189
7.1.2 Heat exchanger demand by application in W. Europe.....	190
7.1.3 Heat exchanger demand by country in W. Europe.....	191
7.2 North America.....	192
7.2.1 Heat exchanger demand by type in N. America.....	193
7.2.2 Heat exchanger demand by application in N. America.....	194
7.2.3 Heat exchanger demand by country in N. America.....	195
7.3 Japan.....	196
7.3.1 Heat exchanger demand by type in Japan.....	197
7.3.2 Heat exchanger demand by application in Japan.....	198
7.4 Asia Pacific*.....	200
7.4.1 Heat exchanger demand by type in Asia Pacific*.....	202
7.4.2 Heat exchanger demand by application in Asia Pacific*.....	203
7.4.3 Heat exchanger demand by country in Asia Pacific*.....	204
7.5 Rest of the World.....	205
7.5.1 Heat exchanger demand by type in ROW.....	205
7.5.2 Heat exchanger demand by application in ROW.....	206
7.5.3 Heat exchanger demand by selected country in ROW.....	207

Volume II

Company profiles (325).....	1-370
-----------------------------	-------

Note:

Regions:

North America: US, Canada, Mexico (NAFTA region)

Asia Pacific: Countries of Asia, Australia, New Zealand

Asia Pacific*: Asia Pacific excluding Japan

5. Finned heat exchangers

5.3.1 Products, features and applications

Finned or extended surface heat exchangers have more compact surface as the tubular and plate-type exchangers. They offer a much larger heat transfer surface with less volume or mass. These heat exchangers apply fins with high fin density on one or both fluid sides to increase the surface area and heat transfer coefficient.

Plate-fin and tube-fin heat exchangers are the two most common finned heat exchangers.

Plate-Fin Heat Exchangers

This heat exchanger design, also known as matrix heat exchangers, uses corrugated fins or spacers sandwiched between parallel plates to transfer heat between gases, gas and liquid, or liquids.

There are three geometries of plate fins

- Uninterrupted and straight plain fins with triangular or rectangular passages
- Uninterrupted and wavy plain fins
- Interrupted fins such as offset strip, louver, perforated and pin fins.

Interrupted fins and their variations are preferred in industry as the materials used are more efficiently than the plain fins to meet the application requirements. Among them offset strip heat exchangers are the most widely used high performance heat exchangers of the plate-fin type.

The materials used for the exchanger plates and finds include

- Metal
- Ceramics
- ...

Chicago Bridge & Iron Company N.V. (NL)

Oostduinlaan 75

2596 JJ, The Hague

The Netherlands

Phone: +31 70 373 2010

Fax: + +31 70 373 2750

<http://www.cbi.com>

Year of foundation: 1889

Number of employees: 26,800

Revenue 2012: USD 5,485.2 million

Company profile

Chicago Bridge & Iron Company N.V. (CB&I), headquartered in The Hague, The Netherlands, is involved in design, construction and manufacturing of infrastructure projects and a complete range of equipment and services for petrochemicals, energy, gas, LNG, water and wastewater and environment sectors.

The company has four business groups:

- Technology
- Engineering, Construction and Maintenance
- Fabrication Services
- Government Solutions

CB&I's product portfolio of heat transfer products by Lummus include:

- Lummus Advanced Breech-Lock Exchanger™
- HELIXCHANGER® Heat Exchanger
- Air Preheaters
- Fired Process Heaters
-
